SUMMARY OF AVAILABLE SOFTWARE

Compiled by Dr. Geoff Mant

The following table lists mosts of the frequently requested DL supported programs, available as executable modules. The dates refer to the last software update.

Program	Description	SunOS 4.1.x *	Irix 4 *	HPux	Ultrix
xotoko	1-D data manipulation	09/10/92	02/12/93	24/06/92	13/04/92
bsl	2-D data manipulation	02/12/93	02/12/93	27/06/92	13/04/92
v2a	vax to unix data conversion	06/08/91	24/06/92	27/06/92	13/04/92
a2v	unix to vax data conversion	19/01/93	-	-	-
otcon	ascii to otoko data conversion	17/02/92	-	-	-
reconv	otoko to ascii data conversion	05/02/92	-	28/06/92	-
tiff2bsl	image plate to bsl format	29/10/92	-	-	-
i2a	ieee to ansi data conversion (DEC only)	n/a	n/a	n/a	
ftorec	Image to reciprocal space transformation	17/05/93	10/01/94	17/05/93	17/05/93
lsqint	2-D integration & background subtraction	09/08/93	10/01/94	09/08/93	09/08/93
fdscale	scaling of intensities	06/07/93	10/01/94	06/07/93	06/07/93
fd2bsl	conversion of intensities to BSL format	03/08/93	10/01/94	03/08/93	03/08/93
u2v.exe	VMS record conversion (VMS only)	n/a	n/a	n/a	n/a

* Implementations for Solaris 2.3 and Irix5 should be available by mid 1994.
n/a is not applicable.
