

Contents

Contents, Cover Caption & Production	1
The CCP13 Committee Members	2
Chairman's Message	3
Fibre Diffraction Featured on Covers of IUCr Publications, R. Millane	4
American Crystallographic Association Annual Meeting, Arlington, R.C. Denny and V.T. Forsyth	5
CCP13 visit to the Experimental Station at the DuPont R & D plant, V.T. Forsyth	7
Report on the 7th CCP13/NCD Workshop, 1998, R.C. Denny	7
Photographs from the 7th CCP13/NCD Workshop	9
The 8th Annual Fibre Diffraction and Non-Crystalline Diffraction Workshop	10
A Profile of the CCP13 Research Assistant	11
Summary of Available CCP13/NCD Software	12

Contributed Articles

The mechanisms of self-assembly and polymorphic switching of the bacterial flagellar filament, K. Namba, K. Hasegawa, I. Yamashita, Y. Mimori-Kiyosue, H. Suzuki and F. Vonderviszt	13
Instrument D19 at the Institut Laue-Langevin: A High Resolution Diffractometer for Single Crystal and Fibre Diffraction Studies, V.T. Forsyth, M.W. Shotton, H. Ye, C. Boote, P. Langan, L.H. Pope, R.C. Denny	17
Block copolymer micelles, micellar networks and mesophases, K. Mortensen	25
Microtubule biopolymers: fibre diffraction and effects of interparticle scattering, W. Bras, G.P. Diakun, R.C. Denny, A. Gleeson, C. Ferrero, Y.K. Levine and J. Fernando Díaz	31
The ups and downs of native cellulose structure, R.P. Millane	36
CCP13 Software Development, M.W. Shotton, R.C. Denny and V.T. Forsyth	40

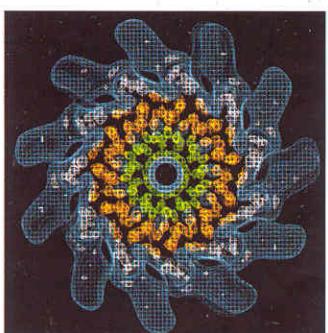

7th Annual Workshop Prize-Winning Abstracts

Myosin head configurations in relaxed, active, rigor and S1-labelled fish muscle; Evidence for characteristically distinct states, J. Harford, R.C. Denny, L. Hudson, R. Mendelson, E. Morris and J. Squire	45
Microphase separation in Poly(oxyethylene)-Poly(oxybutylene) Diblock copolymers, S.M. Mai, J.P.A. Fairclough, N.J. Terrill, S.C. Turner, I.W. Hamley, M.W. Matsen, A.J. Ryan and C. Booth	50

7th Annual Workshop Abstracts	53
-------------------------------------	----

Forthcoming Meetings

The 8th Annual Fibre Diffraction and NCD Workshop, June 15-17th 1999, St Andrews . . inside back cover

Front Cover Image

Electron density map of the R-type flagellar filament at 9 Å resolution. A cross section of a thickness of 50 Å is viewed down the axis. The smooth contours coloured white/blue represent the molecular envelope of the filament, and the detailed contours in green and brown colours are for the inner and outer tubes, respectively.

Newsletter Production

Editor: Prof. J. Squire, Biophysics Section, Blackett Laboratory, Imperial College, London SW7 2BZ

Production: Dr M.W. Shotton, Dr R. Denny and Dr G. Mant, CLRC Daresbury Laboratory, Warrington WA4 4AD

Printer: Eaton Press Ltd, Westfield Road, Wallasey, Merseyside L44 7JB. (Tel. 051-652 9111, Fax 051-653 5936)
